

DEBOSMITA BANERJEE

AI Agent Developer | Full-Stack AI Developer | AIML Undergraduate

Hooghly, West Bengal | 7980418721 | banerjeedebosmita501@gmail.com | [LinkedIn](#) | [GitHub](#) | [Portfolio](#)

EDUCATION

Brainware University

2024 – 2028

B.Tech in Computer Science & Engineering (AIML) | CGPA: 9.94

WORK EXPERIENCE

AI/ML Trainee | Javiyo Consulting Private Limited

Aug 2026 – Present

Artificial Intelligence & Machine Learning Department | Remote

- Selected for a Probationary AI/ML Trainee role, gaining structured, hands-on exposure to Generative AI, LLM, chatbot, and AI-agent applications end-to-end.
- Developing a RAG-based multi-agent chatbot with LangGraph, FastAPI, and a vector database, enabling context-aware, multi-turn conversations for end users.
- Designing AI workflows that automate complaint resolution and visitor management, reducing manual handling steps in day-to-day operations.
- Improved RAG retrieval accuracy by ~20% by tuning chunking strategy and embedding model, reducing irrelevant responses across 500+ test queries.
- Perform exploratory data analysis, feature engineering, model development, testing, and evaluation on structured and unstructured data as part of mentor-led projects.
- Support model and API integration, deployment, monitoring, and documentation while following data-security and confidentiality standards.

Machine Learning Intern | Codsoft

Feb 2026 – Mar 2026

Remote

- Built 3 ML classification models (spam, fraud, genre detection) achieving 92–97% accuracy using Scikit-learn.
- Applied feature engineering and data preprocessing techniques that improved baseline model accuracy by 8–12% and generalization across all three projects.

Campus Ambassador (Leadership Role) | UDAM'26, IIT Guwahati

Dec 2025 – Jan 2026

On-Campus

- Promoted a national entrepreneurship summit through campus outreach and digital engagement campaigns, expanding event visibility among students.

PROJECTS

AI-Powered Breast Cancer Detection System

Mar 2026

GitHub: github.com/Debosmita-14/breastcancer | [Live Demo](#)

- Built a full-stack ML web app (Python, React.js, CNN-based classifier) achieving 94% test accuracy on breast cancer image classification, deployed live on Vercel with sub-2-second inference time.
- Designed a responsive React.js interface for uploading diagnostic images and viewing prediction results in real time.

CivicResQ — AI-Powered Emergency Response Platform

Apr 2026

GitHub: github.com/Debosmita-14/CivicResQ | [Live Demo](#)

- Developed a real-time incident reporting and crisis-management platform using Next.js, Firebase, FastAPI, and machine learning.
- Implemented ML-based incident classification and severity-based prioritization to help responders triage cases faster.
- Built role-based dashboards for citizens, responders, and administrators using Firebase Authentication, Firestore, and Tailwind CSS.

IntervueX — AI-Powered Virtual Interview Platform

2026

GitHub: github.com/kumaresh12818/IntervueX | [Live Demo](#)

- Collaborated in a 3-member team to build a real-time AI mock-interview platform using React, Vite, Firebase, and the Google Gemini Live API for bidirectional voice conversations, including CV-tailored question generation from uploaded PDF resumes.
- Built instant post-interview analytics (communication, technical skill, and confidence scoring) with session history stored in Firestore, styled with a responsive Tailwind CSS glassmorphism UI.

SKILLS

Languages: Java, Python, C, SQL (MySQL)

AI & Machine Learning: Machine Learning, Deep Learning, Generative AI, Large Language Models (LLMs), Retrieval-Augmented Generation (RAG), AI Agents, Multi-Agent Systems, Natural Language Processing (NLP), Prompt Engineering, Model Evaluation

Frameworks & Libraries: LangGraph, FastAPI, Flask, React.js, Next.js, Node.js, Streamlit, Scikit-learn

Data & Backend: Firebase, Firestore, Vector Databases, REST APIs, Google Gemini API, Data Preprocessing, DBMS

Cloud, Tools & Deployment: Tailwind CSS, Git, GitHub, VS Code, Jupyter Notebook, Google Colab, Kaggle, Vercel, Render

Core CS: Data Structures & Algorithms, Object-Oriented Programming (OOP), Operating Systems

CERTIFICATIONS

- Artificial Intelligence Fundamentals — IBM
- Data Structures and Algorithms using Python — NPTEL
- Oracle Cloud Infrastructure (OCI) Foundations — Oracle
- Generative AI Concepts — Microsoft
- Google AI Essentials — Google

ACHIEVEMENTS

- Top 5 — HackArena 2.0, a National Hackathon, IIIT Delhi.
- Finalist — Nexathon University Hackathon.
- Top 30 — Bluster (Unstop) Coding Competition.
